About eTLipse

eTLipse Computação, Engenharia e Responsabilidade Social Ltda. is a company located in Brazil, specialized in instruction, consulting and services of software development for the Architecture, Engineering and Construction Industry.

About our software

TL Solids - Interaction Tool for Revit® is a free add-in application that enhances the experience of Autodesk® Revit® users when performing solids operations, visualization and selection of elements.

About your personal data and information

Once you have downloaded the TL Solids installer from the Autodesk® App Store, by installing and running our software you **are not** asked for any kind of personal information or payment data.

Our software **does not** contain any kind of authentication or authorization feature and **does not** collect any kind of user information during its usage, being its code entirely focused on User Interface mechanics and Revit® modelling transactions and processes.

Our software **does not** transfer or place in your computer any kind of data collection log files, such as cookies and other similar tools.

Our software **does** include external links to our institutional web page, which presents support and instructional material, as well as offers of other products and services by the company.

The only personal information we can access is provided by the Autodesk® App Store once the user has downloaded the installer file of our product, being this personal information the following: *nationality, language, name, operating system, company name, e-mail, date, time and quantity of downloads*, when provided by the user.

About the usage of your personal information

Aside from the Autodesk®'s own privacy policy, the usage of the aforementioned personal data is limited to eTLipse's research, storage and private communication with the users (software updates, new tools and services offered and announced by e-mail). No sharing or public usage is done with the user information provided by the Autodesk® App Store.

About your rights

You, as a user, are completely entitled to demand the retrieval, updating, transfer, consulting, rectification and/or deletion of any of your personal data stored in any of our databases.

About this Policy

This Policy applies to every feature and tool offered in the *TL Solids - Interaction Tool for Revit®* software, as well as every service and feature this product eventually uses in the eTlipse's website and databases. By using this product and its related services, **you agree** to the terms and conditions proposed in this document.

This Policy for this specific product maintains its effects until a newer one is released and approved by the *Autodesk® App Store*. We reserve ourselves the right to change or update its terms at any time, given the *Autodesk® App Store's* approval as well.

Contact

For any clarification, explanation, complaints, objections, criticism or suggestions, please, do send us an e-mail: info@etlipse.com.
